20,000 ROAD SIGNS ON PROGRAM THIS YEAR.

Alberta highways will be marked for directional purposes with 15,400 new signs this year, according to information received from the public works department by the Alberta Motor Association.

In addition, 2,500 road marking signs also will be located on main and secondary highways.

The signs are painted with a new luminous paint which shows up during night driving. This type of paint has been found very effective in improving safety features on highways and reducing the number of accidents.

By June 10, the public works department had erected 6,400 new signs on main and secondary roads and it planned to install another 12,000 immediately.

At a midsummer meeting in Calgary last June, members of the provincial board of the Alberta Motor Association expressed favor for more extensive road marking in the province. This need was stressed. It was decided that further action should be left in the hands of the provincial A.M.A. president and executive.

With an increased flow of tourist traffic this year, there are pressing demands for an adequate standard system of highway signs being in operation.

The patients entering Raymonds Municipal Hospital will in future be given a tuberculin test for discovery of tuberculosis. It was announced today by Hospital officials.

This service is provided free by the Alberta Tuberculosis Association financed by the annual Christmas Seal Sale, and the hospital is co-operating by administering the tests and keeping the records, and also by undertaking to give a chest X-ray to all the positive reactors, at a cost of only \$2.00 to the patient.

The tuberculin test does not indicate that a person has tuberculosis. It merely shows whether or not he has ever picked up even a slight infection. Most people who react to the tuberculin test never develop tuberculosis. The test is given in an extremely simple and convenient way, namely by a small patch very much like a band-aid, with a small square of gauze, which holds tuberculin serum. This is placed against the skin.
